### INTERGEO 2011 – Z+F strikes again with richness of innovations

Just a year ago we have set new standards for phase scanners in all application fields with the Z+F IMAGER 5010. For us innovation is strictly a passion. Those who attended INTERGEO experienced pace-setting innovations, such as the **Z+F PROFILER 9000 with impressive 200 rps rotation speed.**

Hardware issues: Besides the new PROFILER model we have reshaped the IMAGER 5010's firmware. One feature is the scanner setup above a known coordinate allowing time-saving one-target registration. Fluent control through our intuitive touch screen menu has even been improved.

Software issues: We continue the success of the LaserControl Software with a new component for point cloud registration. **RegisterCloud** allows a **targetless registration** of point clouds and accuracies of classic vertex-vertex registrations can be achieved. You will be able to work with this feature within LaserControl Release 8.2 from November 2011.

### LaserControl 8.2 New Licensing

Our customers' feedback is important to us. Beginning with Release 8.2, LaserControl will be licensed with a dongle. You will gain the following advantages:

1. No need of time wasting yearly license updates
2. Use as network dongle with multiple licenses loaded
3. Freely switch the dongle to the hardware which fits best to your project, e.g. in the office on your workstation, in the field on your notebook... just one dongle!
4. Plug&Work! Automatic dongle recognition, as well in networks

### New Z+F Reseller for Hardware and Software in Germany

We kindly welcome the colleagues from 4GEO among our trusted resellers in Germany. 4GEO is located in Bergisch Gladbach and will cover the sales area of ZIP 0 to 5. With over 20 years of experience in the survey- and construction sector 4GEO will be your competent and reliable partner. CEO Dietmar Laqua is pleased to receive your call. Please, take note of the contact details:

#### 4GEO

Schloddericher Weg 44  
51469 Bergisch Gladbach  
Germany  
Tel.: +49 22 0294 1160  
Fax: +49 22 0294 1166
