Rental of Z+F laserscanner and equipment

To meet customer requirements it becomes necessary more and more to make use of 3D laserscanning technology. Even if the investment in purchasing a laserscanner might not seem a profitable venture for short term projects, it is however possible to rent Z+F laserscanners and equipment as well as software, Z+F LaserControl and LFM, to benefit from the great advantages of laserscanning technology.

Please find enclosed a list of our available rental units and prices. Feel free to ask about price information on software rental.

iPhone - compatible with Z+F laserscanners

Did you know that you can operate the Z+F laserscanners with your iPhone 4 or 3Gs? You can access all Z+F laserscanning devices which are equipped with a wireless LAN module via the Safari browser.

For this reason it is not necessary to take a laptop or netbook with you to the scanning project if you want to access the scanner wireless.

3D laserscanning within Forensics - gun rampage in Hamburg-Hamm

On 06 April 2011 a gunman opened fire in Hamburg-Hamm (Germany). The tragic outcome of this criminal act was that two people lost their lives and two more are seriously injured. Shortly after the action, the crime scene was scanned by experts from the local CID in Hamburg. The laser scanner was used to "freeze" the crime scene and allow to reconstruct the sequence of events.

At first it was not clear how the act happened and from where the first shots were fired. After a short period of time the police discerned that the offender shot from a place close to Hamm's Market Square.

Initially everyone assumed the gunshots were fired at underground station "Hammer Kirche", because one of the victims managed to escape to this place. So far not all the background details have been explained. But one thing is certain: The 3D data will help the police to visualize the whole crime scene better. Even after many years the data will still be available.

In this case the collection of data was realised with the Z+F IMAGER 5006i.

Z+F at INTERGEO 2011 in Nuremberg

Visit us at our **Stand C17** in **hall 6** from the 27. - 29. September 2011.
